F50 PROFILI CALBRATORE IN METRI

Profile calibrator	
Code	F50-K42

User guide and instructions

/ Fig. 1

Step 1 (Fig. 1)

Calibrator's Overview

1. Support base with attached ruler measuring up to 1 meter.
2. Profile Holder.
3. Tightening Handles.

Panoramica del calibratore

1. Base di supporto con righello fissato fino a 1 metro.
2. Supporto del profilo.
3. Maniglie di serraggio.

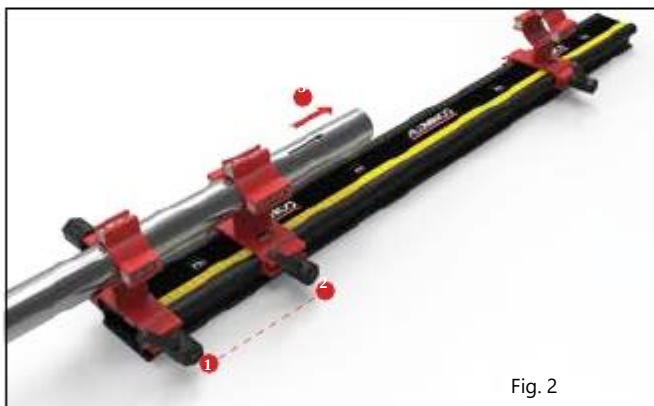

Fig. 2

Step 2 (Fig. 2)

1. Constrain 1st holder to the starting place of the support base.
2. Place 2nd holder to the precise distance we need to drill hole onto the inserted profile.
3. Then insert the profile to the holders.

1. Vincolare primo supporto per punto di partenza della base di appoggio.
2. Posizionare il secondo supporto sulla distanza precisa che è necessaria sul profilo inserito.
3. Quindi inserire il profilo sui supporti.

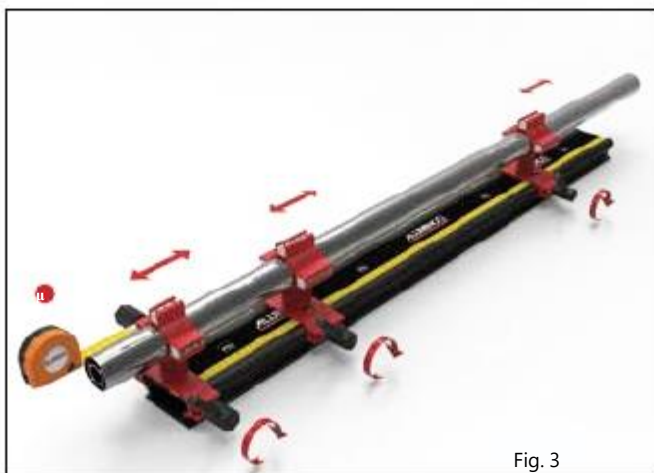

Fig. 3

Step 3 (Fig. 3)

We tightly fix the inserted profile to the hole drilling position using the handles, having measured with caution.

Note: If profile's length is more than 1 meter, then we calculate the footplate's height (table 1) via a gauge (fig. 3).

Fissiamo saldamente il profilo inserito alla posizione di sgocciolamento del foro usando le maniglie, avendo misurato con cautela.

Nota: se la lunghezza del profilo è superiore a 1 metro, calcoliamo l'altezza della pedana (tabella 1) tramite un manometro (figura 3).

step 4 (fig.4)

1. Controllare che le distanze del foro siano correttamente calcolate
2. Se useremo 4312, 4232, 4225, 4224, 4252, 4341, 4335, 4355, 4324, quindi la perforazione del foro del profilo sarà fatta puntare (a) come in Fig. 4.
3. Se utilizziamo gli accessori 4168, 4172, 4173, quindi verrà eseguita la foratura del profilo punti (b) come in Fig. 4.
4. Forare il profilo al rispettivo desiderato punti (a) o (b). (vedi Fig. 4 / 4A).

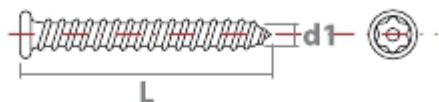

Step 4 (Fig. 4)

5. Check that the correct hole distances have been calculated.
6. If we will use 4312, 4232, 4225, 4224, 4252, 4341, 4335, 4355, 4324, then profile hole drilling will be made to point (a) as in Fig. 4.
7. If we use accessories 4168, 4172, 4173, then profile hole drilling will be made to points (b) as in Fig. 4.
8. Drill the profile at the respective desired points (a) or (b). (see Fig. 4/4A).
